GIN

Gin is a distilled spirit that is flavoured with botanicals such as juniper, angelica, liquorice, coriander, lemon peel and even cucumber or green tea. The various amounts and combinations of botanicals create certain flavours with distinctive notes.

Every single one of the gins on our menu have been tried, tested and selected based purely on quality. I am extremely impressed with the local offering for gin and I am sure more will earn a place on our bar over time. The 50+ that we have so far will excite the taste buds of gin specialists and beginners alike.

SPIRITS

Vodka is a completely clear spirit that can be produced from anything containing starch, with the most common bases including potatoes, sugar beet molasses and grain. Even though some describe vodka as tasteless and flavourless, the raw material used in the production process is what differentiates one vodka from another. Vodka is about purity and each of our vodkas have been specially chosen for their unique qualities.

Well known as the finest of all the spirits, it is distilled from a single grape variety with thousands of flavours and sensations, ranging from fruitiness, warmth, spicy and dry, to oak notes. Cognac has been described as a 'liquid history in a bottle'. Many Cognacs are aged in the 'Paradise', the area in an ageing cellar where the Cognac is kept for long ageing.
